## EDUCATION

- **TKM College Of Engineering**: Bachelor of Technology in Computer Science and Engineering; GPA: 6.71

## EXPERIENCE

- **Kesans Software Solutions Private Limited**: Front End Testing Engineer (Dec 2023 - Feb 2024)

  - **Front-End Testing for Kanakbooks**: Actively participated in the front-end testing of the reporting module for Kanakbooks, a cloud-based accounting software tailored for SMEs.
  - **Verification and Bug Reporting**: Contributed to the verification and bug reporting of the front-end module developed in Angular, significantly enhancing the software's functionality and performance.

- **IEI CSE TKMCE Kollam**: Secretary (Jun 2023 - May 2024)

  - **Event Organization**: Planned, coordinated, and managed a team responsible for organizing events for computer science students.
  - **Cross-Disciplinary Initiatives**: Collaborated with other clubs and organizations to promote cross-disciplinary initiatives and broaden the impact of events.
  - **Communication**: Communicated effectively with club members, faculty, and external stakeholders to execute successful events.
  - **Administrative Tasks**: Managed administrative tasks such as budgeting, scheduling, and documentation to ensure smooth operation of the club.
  - **Member Engagement**: Developed and implemented strategies to enhance member engagement and participation.

## PROJECTS

- **SwiftX**: Created a platform for seamless cross-border money transfers using Stellar blockchain, with features for transaction tracking and social connections. GitHub : https://github.com/Sinanpakkada/SwiftX

- **Hogwarts Sorting Hat**: Developed a dApp for sorting users into Hogwarts houses using Chainlink's VRF on the Polygon Mumbai testnet. GitHub : https://github.com/Sinanpakkada/hogwarts-dapp

- **Hostel Management App**: Developed a hostel management app with features for room allocation, maintenance requests, fee management, and notifications. GitHub : https://github.com/Sinanpakkada/Hostel-Management-Client-Side

- **Time Schedule Generator**: Created an app for time management and productivity enhancement, including guided exercises. GitHub : https://github.com/Sinanpakkada/Time-schedule-generator

- **Skill Chain**: Built a blockchain-based platform for tracking job experiences, ensuring transparency and authenticity. GitHub : https://github.com/Sinanpakkada/skillchain3-v1.0.1

## PROGRAMMING SKILLS

- **Languages**: Python, Javascript, C, SQL, Java, Solidity, Dart

- **Technologies**: Flutter, Google Cloud, React, Smart Contract Development, Data Science

## CERTIFICATIONS

- **Python for Data Science**: NPTEL Online Course by IIT Madras (Jul 2023 – Aug 2023)
